

Task2.5 - Recipe Model

Initial Attributes

- Recipe_id: primary key (auto incremented)
- Name: Character Field (Max length = 120)
- Cooking_time: integer field
- Ingredients: text field

Updated Attributes

- Remove - Recipe_id: primary key (auto incremented)
 - Django automatically adds the id field, this will remove redundancy
- Name: Character Field (Max length = 120)
- Cooking_time: integer field
- Ingredients: text field
- Pic: image field
 - This will add a picture of the finished recipe
- Difficulty: text field with calculation logic
 - This will add calculation logic of how difficult a recipe can be.
